PRODUCT DATASHEET

RO Membrane

OVERVIEW

The Tech Inc. RO Membrane is a reverse osmosis membrane system engineered for membrane research, water treatment, and industrial applications.

APPLICATIONS

Seawater desalination research, fresh water production, wastewater reclamation, boiler feed water treatment, industrial purification, academic research.

KEY ADVANTAGES

- High-performance thin-film composite membranes
- High salt rejection rates
- Extended membrane life
- Pressure-resistant design
- Suitable for both R&D and pilot-scale evaluation
