PRODUCT DATASHEET

FO Membrane

OVERVIEW

The Tech Inc. FO Membrane is a forward osmosis membrane system engineered for membrane research, water treatment, and industrial applications.

APPLICATIONS

Seawater desalination research, wastewater treatment, resource recovery, draw solution research, industrial process development, academic research.

KEY ADVANTAGES

- High-efficiency osmotic membrane
- Low operating pressure
- Minimal fouling characteristics
- Suitable for both R&D and pilot-scale evaluation
- Compatible with various draw solutions
