PRODUCT DATASHEET

Colour-Coded Oil Transfer Containers and Lids

Sealed top-up containers, 1.5 to 10 L

DETAIL – PUMP, STRETCH-SPOUT AND UTILITY LIDS

OVERVIEW

The Tech Inc. Colour-Coded Oil Transfer Containers and Lids carry oil from the lube room to the machine without dirt, water or mix-ups. Each container is sealed, graduated and colour-coded to one lubricant, and the lid is chosen to suit the fill point, so technicians top up quickly and cleanly with the right oil every time.

MODELS AND CONFIGURATIONS

- **Storage lid** – sealed, with a breather cap, for holding oil between jobs.
- **Utility lid** – wide outlet with a cap, for fast filling and heavier oils.
- **Stretch spout lid** – flexible spout that reaches awkward fill points.
- **Mini and stumpy spout lids** – narrow or short spouts for small and angled ports.
- **Pump lid** – hand pump fitted through the lid for raised fill points.

TYPICAL DESIGN DATA

Sizes	1.5, 2, 3, 5 and 10 L (other sizes on request)
Body	HDPE, translucent so the level is visible, moulded graduations
Lids	ABS / polypropylene, in up to 11 colours
Seals	Nitrile as standard, Viton for synthetic and ester oils
Oil range	Spout lids up to about ISO VG 220; utility and pump lids up to ISO VG 680

APPLICATIONS

Plant maintenance, gearbox and bearing top-up, hydraulic reservoirs, compressors, turbines and mobile fleets.

KEY ADVANTAGES

- **Clean oil at the machine** – sealed lids keep dust and water out from fill to top-up
- **No mix-ups** – one colour per lubricant, matched to labels on the machine
- **Less waste** – graduations and spouts stop over-filling and spills
- **Faster top-ups** – the right lid for each fill point saves time on every round
- **Part of a full system** – matches our ID labels, pumps and bulk storage
