PRODUCT DATASHEET

Lab Scale Reverse Osmosis Test Skid with DAQ

DETAIL – CLOSE-UP

OVERVIEW

A comprehensive reverse osmosis testing platform with integrated data acquisition for research and development applications.

APPLICATIONS

RO membrane testing and characterisation studies; water quality improvement research and validation; industrial desalination technology development; brackish water and seawater RO process optimisation.

KEY ADVANTAGES

- Integrated Data Acquisition System with real-time data logging and analysis
- High-precision pressure regulation and control systems
- Accurate flow and conductivity measurement instrumentation
- Temperature monitoring and environmental control capabilities
- Corrosion-resistant materials for longevity and reliability
